Segmentation & mixed methods articulation with listening history data

Publication of findings in high-impact journals

Research Scope:

- **Goal:** Understand the impact of music streaming algorithms on listening diversity.
- **Methods:** Survey design, statistics, causal analysis, networks, Python.
- **Datasets:** Deezer users' listening logs, RECORDS survey on on vs off platform music practices

Outcomes

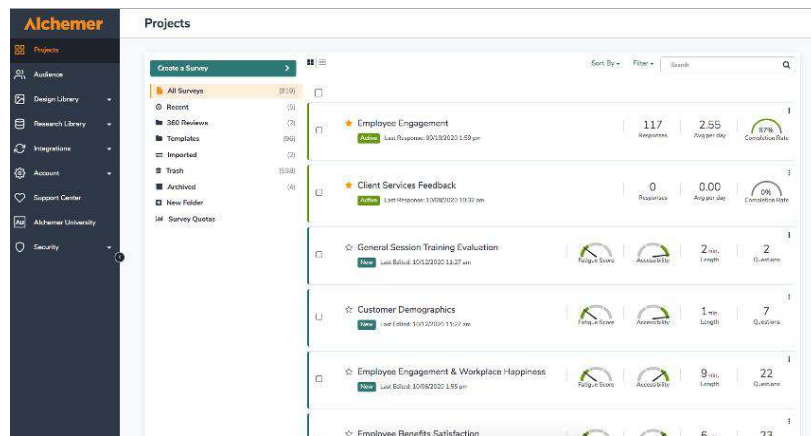

- Contributed towards the creation of one of the largest surveys on listening practices in France.
- Developed novel framework to appraise the effect of algorithmic recommendation on listening diversity.
- Published in 3x high impact conferences / journals to communicate findings to wider audience.
- Analysis contributed towards PhD in Computer Science.
- Chaired seminars on music streaming, networks & recommender algorithms.

MY RESEARCH

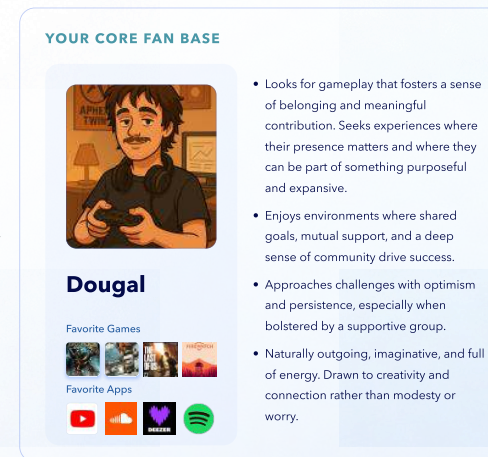

Solsten - Mobile IP Concept Test

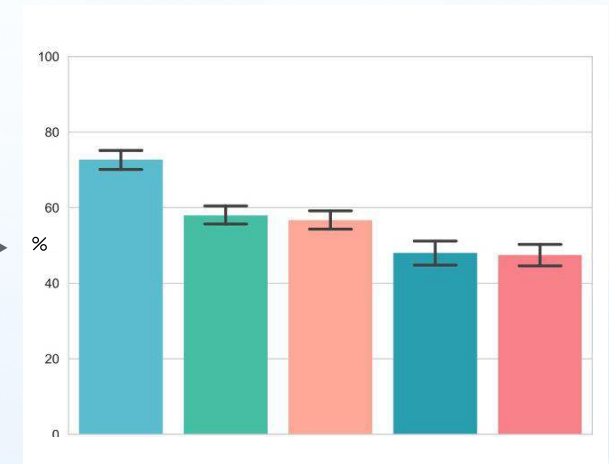

Survey design & monitoring

Audience segmentation & persona creation

Data Analysis & Reporting*

Research Scope:

- **Goal:** Understand major mobile IP's brand health & concept test new franchise dev.
- **Methods:** Concept testing, Brand awareness
- **Datasets:** Survey data attained through partner, Alchemer.

Outcomes:

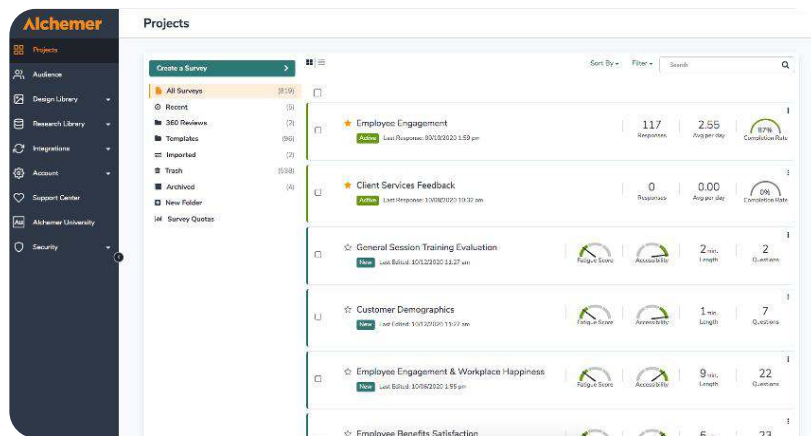

- Delivered research insights to guide marketing strategy, identifying priority audiences and channels for maximum impact.
- Equipped the brand health team with multi-market, cross-cultural data on brand awareness and affinity.
- Clarified the relationship between player psychology and franchise affinity, enabling more targeted and effective audience segmentation.

MY RESEARCH

Solsten - Defining an IPs next 5-10 years

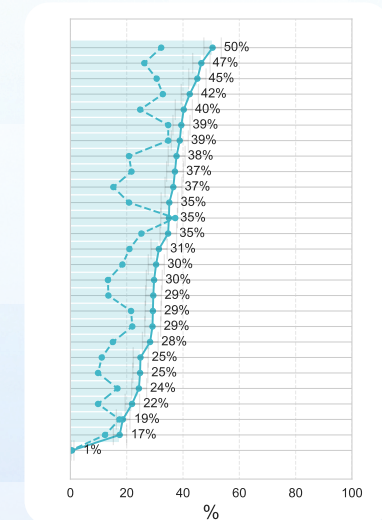

Survey design & monitoring

Audience segmentation & persona creation

Data Analysis & Reporting*

Research Scope:

- **Goal:** Understand IP's best evolution path over the next 5-10 years.
- **Methods:** Competitor analysis, brand health, concept testing.
- **Datasets:** Survey data attained through partner, Alchemer.

Outcomes:

- Defined strategic directions for the IP's evolution over the next 5–10 years.
- Uncovered opportunities both within the game experience and across broader brand touchpoints.
- Benchmarked brand health against key competitor titles to contextualize performance.
- Segmented audiences to surface the most resonant personas for each potential expansion path.
